## **Hermani**

**Multiple-Flowered  
Giants**

Now, for the first time, Max Schling offers a new strain of Narcissi combining boldness and gracefulness with stems averaging three flowers to a cluster, each bloom averaging 2 to 3 inches in diameter.

A planting of these bulbs creates a triple effect, each stem being the equivalent of three stems, and there are many bulbs that will have two stems each. New garden effects can be obtained by the liberal use of this new strain, and startling cut flower arrangements are possible with the splendid cluster effect.

**Order Early to Avoid Disappointment  
See Inside Back Cover**

Our Rarity Collection of Daffodils and Narcissi has become so popular that original purchasers of this collection have become "spoiled" for other varieties.

Because of the tremendous demand for this collection, and the countless testimonials we have received from those who have already been enchanted by these outstanding varieties, we are again featuring this offer, although we do suggest that careful consideration be given the outstanding varieties offered in our Exhibition and Connoisseur Collection.

To those who have not already grown our Rarity Collection we can only say that there is no finer Daffodil value offered in the entire horticultural world.

## *Daffodil*

## **Babylon Majestic**

The breath-taking beauty and enormous but gracious size of this gorgeous Daffodil appearing on the cover is too difficult to describe. For actual size measure the flowers in the color illustration with a rule.

We are happy to report that the performance of this variety in our trial gardens was so outstanding that a popular favorite such as **King Alfred** seemed to be out-classed by its performance.

Fortunately, however, **King Alfred** is at least a week earlier to bloom, and, therefore, we will not claim that **Babylon Majestic** will supplant that ever-popular variety, but in reality **Babylon Majestic** will extend the enjoyment period for those who love huge butter-yellow Daffodils.

We still recommend **King Alfred** as the best **forcing variety** because of its earliness.

Schling's famous Sequoia strain. A lasting bulbous plant that should be in every home as it is deserving of the greatest popularity.

See our listing of a famous private estate collection.

## **J A P - A T A C**

A positive all-time control. This is the Milky Spore Disease proved to be the specific control for Japanese Beetles. Can be applied any time, never loses strength. Once your ground is inoculated with this powder, it remains inoculated forever. Non-poisonous, perfectly safe to use. 1 lb. will treat 4,000 square feet. Manufactured by J. J. Parker under U. S. D. A. license and patent number 2,258,319. \$5.15 per pound, postpaid.

# A Message from Schling's

The warm and gratifying response we have received upon the issuance of our Advance Bulb List is indicative of many things, an appreciation of the beauty of spring bulbs which were planted last year in many instances for the first time since 1939, and the desire of many to observe a symbol of peace right in their own gardens.

The romance of the preservation of the Holland bulb fields under the duress of a painful foreign occupation will undoubtedly provide exciting material for authors and historians for generations to come.

The season of 1946 will see Holland bulb production right back to normal. Prices are lower, quality and selection materially improved.

Our guarantee label which appears throughout this catalog means exactly what it says. During the past five years it has required great effort and ingenuity on our part to have been able to offer as comprehensive a bulb listing as we had in that period. It was not always possible for us to supply bulbs of as fine appearance and size as we would have liked to supply, although the blooming performance of our wartime stocks was excellent.

We know now that we can supply top quality in top size bulbs, and that is why we are eager to make this guarantee. There is no question about our bulbs this year. They will be better than ever.

Postage paid on all orders for bulbs only, in second postal zone from New York City. All other orders in excess of five pounds will be shipped express collect, unless remittance for postage accompanies order.

### TIPS ON TULIP CULTURE

It is better to plant deep than shallow. In heavy clay soils plant from 5 to 8 inches deep, in light, sandy soils 7 to 10 inches. Do not mix manure or other undecomposed organic matter in the soil around or directly under the bulbs. Such material should be mixed into the subsoil to a depth of 20 inches or more. A layer of top soil 2 inches deep should separate the bottom of the bulb from the organic matter.

In latitudes north of New York City apply mulching material only after hard frost has set in. Best planting date October 1st to November 25th. Planting can be continued safely through the entire month of December, weather permitting.

### Our Famous OREGON TRAIL MIXTURE Of Daffodils and Narcissus For Naturalizing

See page 1. Our standard value offering since 1915.

If anything, our carefully blended mixture of Daffodils and Narcissi, which has been our outstanding bulb value for the past thirty years, should be better this year than ever before, for we can add a much wider selection of varieties. Consistently one of the most satisfactory items ever sold by our firm. A long time investment in beauty.

### NORMANDY

NORMANDY is an entirely new member of the race of Daffodils introduced by us the first time last year. We have received many commendations from those who tried them and many prizes were won at various shows.

Each floret is as large as a Barri or Incomparabilis type and the flowers are borne in clusters of three to a stem blooming quite late in the season.

One does not have to be a Narcissi fancier to appreciate the beauty and practicality of this variety for garden effects and startling cut flower arrangements.

# Schling's SUPERB HARDY Garden

All Lilies, with the exception of Madonna Lilies, are delivered in late October and early November. For those who are afraid that the ground may be frozen before this date, we recommend the following: Select the spot where the Lilies are to be planted; cover well with leaves, straw, salt hay, etc., to prevent the intrusion of frost. With this treatment it will be possible to plant Lily bulbs through November and December in the coldest climates.

Planting depth on all Lilies except Candidum, 6 to 8 inches over top of bulb; Candidum 2 to 3 inches.

## Madonna Lilies (L. Candidum)—Imported French Grown

June Blooming. Plant September 1st to November.

There are no Lilies that are as interesting and as inspiring as the lovely Madonna. Symbolically chaste and graceful they really steal the show from gaudier garden subjects. Plant in masses for best effect. They increase in beauty each year.

## Leucocoryne

(Glory-of-the-Sun)

Plant September to February.

Gorgeous, fragrant blue flowers on graceful wiry stems. Cut flowers last ten days to two weeks. The CHOICE bulbs we offer will give 100 per cent bloom. Same culture as Freesias. Jumbo bulbs, \$1.75 per doz.; \$13.00 per 100.

## Freesias

SCHLING'S NEW PATENTED VARIETIES

Plant September to November.

These new varieties represent a new race of Freesias. The flowers are immense, twice the size of ordinary varieties; the colors are intense, they are strong, virile growers, and the flowers are borne on immense trusses. None of these improvements have minimized the fragrance of the old type. In fact, the delicate and delightful aroma seems to be enhanced in these new varieties.

**Apple Blossom.** Delicate pink. (U. S. Plant Pat. No. 486.)

**Bronze Giant.** Combination of copper and bronze.

**Giant Cream.** Enormous cream-yellow, distinct orange-yellow throat; very tall, vigorous. Delightful fragrance.

**King of the Yellows.** (U. S. Plant Patent No. 488.)

**Maryon.** Beautiful mauve. (U. S. Plant Patent No. 32.)

Belgian-grown bulbs: \$3.00 per doz.; \$22.00 per 100.

## Narcissus (Polyantha)

Plant October to January.

**Paper-White Grandiflora.** 100 per cent American-grown. This splendid bulbous plant is as well known to the American public as apple pie. No home or apartment is complete without one or more bulbs of the beautiful white, star-shaped flowers in various stages of growth. All bulbs are jumbo size, especially grown for us and are sure to bloom. Jumbo bulbs, \$1.25 per doz.; \$9.00 per 100.  
**Grand Soleil d'Or.** A golden Paper-White. \$2.00 per doz.; \$15.00 per 100.

## Ornithogalum

(Star of Bethlehem)

Plant October to January.

**Arabicum.** A beautiful and impressive easy-to-grow bloom. Huge clusters of pure white, star-shaped flowers with black "shoe button" eyes on strong, graceful stems. Increasing in popularity. \$2.00 per doz.; \$15.00 per 100.

**Aureum.** Gorgeous heads of brilliant orange. A splendid greenhouse forcer. Pot cultivation recommended. \$2.00 per doz.; \$15.00 per 100.

## Oxalis

Plant September to February.

**Bowiei.** Easily grown in the home. The lovely foliage resembles perfect giant four-leaf Clovers, and flowers are a delicate pink.

**Bermuda Buttercup.** Rich golden yellow.

**WRITE FOR OUR COMPLETE LISTING OF STRAWBERRY VARIETIES**

### TWO WONDERFUL NEW RHUBARB VARIETIES

**Chipman's Canada Red.** The newest and finest Rhubarb. Very sweet and tender; of the finest flavor with extra large stalks. Bright red all the way through, the red color extending even to the mid-rib of the leaf. This variety retains its beautiful color in cooking, and both sauce and pies are an appetizing cherry-red color. This variety definitely does not go to seed during the summer, and therefore, can be used throughout the entire summer. Price: \$1.00 each; 6 for \$5.50, postpaid.

**MacDonald.** Stalks are tender, of unsurpassed flavor, and of a bright crimson. When cooked, the color is a beautiful shade of pink. High yield, strong and robust. MacDonald can be used all summer. Strong roots. 75c each; \$8.75 per doz., postpaid.

In our opinion these two varieties of Rhubarb preclude the necessity of planting any of the older varieties. We are discontinuing the listing of all older varieties in favor of these two which we consider the greatest advance in this line. Rhubarb should be planted four feet apart, and the crowns set so that they are covered 2 inches below the surface.

### Veltheimia

(Cape Lilies)

**Plant September to November**

**Viridifolia.** One of the finest blooming house plants from a bulb. Tall, heavy spikes of brilliant bloom with beautiful foliage. Plant one in a 5-inch pot. 85c each; \$9.50 per doz.

### Lily-of-the-Valley Pips For Indoor Forcing

As we go to press we have the assurance of being able to supply GENUINE DANISH-GROWN PIPS especially treated for home and greenhouse forcing. These are not to be confused with Dutch-grown or domestic pips.

For best results start planting December 1st for Christmas bloom, and thereafter. Planting can be continued until late April. Blooming period 3 to 4 weeks from planting. For best results use Schling's Prepared Bulb Fiber.

Price: 12 pips for \$2.25; bundle of 25 pips, \$4.25; \$16.00 per 100.

**Supply very limited—subject to ability to supply.**

### Destroy Japanese Beetles in Your Area For All Time JAP-ATAC

#### MILKY DISEASE SPORE POWDER

U. S. Department of Agriculture Formula  
 Made Under Government License and Supervision  
 U. S. Department of Agriculture has finally found the specific control of Japanese Beetles, the Milky Spore Disease which remains ever present and active for all time on the ground. In fact, its effectiveness spreads by means of bird droppings, wind, etc.  
 Experiments proved that in less than two years the beetle population of the most highly infested areas has dropped almost 60% and in three years has become almost non-existent. The parasitic disease attacks the larvae in the ground and need only come in contact with the larvae to cause infection.

#### Non-Poisonous, Perfectly Safe to Use

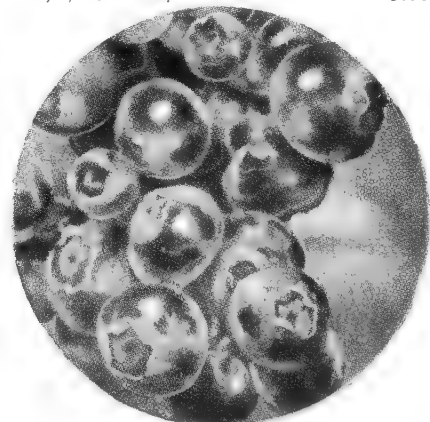

Full instructions for many methods of application appear on each package. It is easiest to apply by mixing proper amounts with fertilizer and distributing it at the same time. The material never spoils. It can be kept for years and, remember, once your ground is inoculated, it remains inoculated forever. For guaranteed beetle protection, use it yourself, induce your neighbors to use it and influence your local civic organization to use it.

Price: \$5.15 per lb., postpaid anywhere in U. S. A. No discount for quantity. One pound sufficient for 4000 square feet.

**VIOLA**. All varieties in separate colors or mixed.

## PESTEX—The Mole Repellent

This great discovery has proven amazingly successful in repelling all destructive and bulb-loving rodents such as moles, field mice, squirrels, chipmunks, etc.

Dust your bulbs thoroughly before planting. One pound is sufficient to treat 100 Tulip bulbs or more and leave enough over to mix in the soil in order to make your bulb beds absolutely "pest-proof." This product is non-poisonous and absolutely harmless to bulbs, roots and foliage.

Price: 60c per lb.; \$4.50 per 10 lbs., postpaid.

# Outstanding Bulb Developments for 1946

Outstanding in our trials for the past season were the lovely Peony-Flowered Tulips, the new and more practical Parrot or Fantasy type Tulip and the outstanding new Botanical or Species Tulip.

The Double Late Tulips were very impressive because of their adaptability as a cut flower as well as a garden flower. A cut vase of these resembles nothing more than a gorgeous arrangement of Peonies. The new Parrots are notable for their strength, stiff stem and strong petal substance, making them also an ideal cut flower.

Botanical Tulips heretofore have been confined to the popular Clusiana, Kaufmanniana and Eichleri. There are now a whole series of brilliant flame colored Tulips that are earlier than Crocus, starting with Red Emperor and continuing with Princeps and Fusilier.

Every garden should have at least one clump of the flaming Red Emperor.

## PESTEX

A remarkable preparation that will positively repel all forms of moles, field mice and other rodents that are destructive to bulbs. 60c per lb.; 10 lbs., \$4.50, postpaid. 1 lb. sufficient for treatment of 200 bulbs. Absolutely harmless to plant life.

## BULBS FOR HOME GROWING

The advantages and beauty of bulbs grown in the home during the long winter season have but recently been recommended.

In the past many flower lovers were content to grow Paper-White Narcissi and an occasional pot of Lily-of-the-Valley, never daring to attempt some of the lesser known but more alluring bulbous plants.

We offer for your consideration a list of bulbs that can be planted with every assurance of complete success in the home.

### Amaryllis, Sequoia

#### Hybrids

Calla Lilies, White

Calla Lilies, Yellow

Freesias For bright rooms and temperature not over 60 degrees.

French White Roman

#### Hyacinths

Lochenalia

Veltheimia

The above list can be regarded as almost fool proof, but we, of course, suggest that any of the other items appearing in our Indoor Bulb Section should be attempted, for with a modicum of care and understanding very satisfactory results can be obtained.

## RARITY *Collection* of NARCISSUS and DAFFODILS

This outstandingly beautiful collection of Daffodils and Narcissus, illustrated on our back cover, is worthy of consideration by all garden lovers. The connoisseur will delight in being able to purchase these selected and outstanding varieties at a nominal price, whereas the gardener who appreciates beauty for beauty's sake is enabled to obtain these "out of reach" varieties at practically the cost of ordinary varieties.

Three years ago the cost of the entire collection of three each would not have bought four bulbs of the variety Lord Wellington alone. Our supply of these varieties, while sufficiently ample, will definitely not last through the season. Place your order early to insure delivery.

3 each of above outstanding collection ( 15 bulbs in all) \$3.85  
6 each of above outstanding collection ( 30 bulbs in all) 6.50

## Schling's Famous PANSY PLANTS

We are offering again, for fall planting, our sensational Majestic Splendor strain in strong, well developed plants. These plants, from seeds sown this summer, have been especially grown and hardened. They may be set out in beds this fall, and thus have the advantage of spring-planted Pansy plants in that they are well developed with a strong root system by next spring and receive no check from transplanting at the time that they are intended to bloom.

We are certain that the satisfaction derived from a trial planting of these splendid plants will convert all Pansy enthusiasts to fall planting of these cheerful garden requisites.

We recommend that in the region of New York and farther north, protection be given them by either hilling the soil up to within an inch of the top of the plant, or else providing a protective mulch, such as salt hay or leaves.

**Collection No. 1.** 25 plants each in the following colors: Deep golden yellow, pure white, solid blue, and wine shades.

**Collection No. 2.** 25 plants each in the following colors: Yellow, cornflower-blue, white and deep blue.

**Collection No. 3.** 25 plants each in the following colors: Yellow, blue, wine shade and giant bronze.

It is an Established Fact That **FALL SOWN LAWNS ARE BEST**

## Schling's "REPUTATION BUILDER" Grass Seed Mixtures

In a great measure the reputation of a seed house depends upon the quality of the grass seed mixtures offered. Because it is an item that is almost universally purchased by anyone who has any ground whatever, and because there has been and is such a wide variance in the quality of the lawn mixtures offered, it becomes increasingly important to acquaint the purchaser of grass seed with the history behind a quality mixture.

A grass seed mixture may be offered under any brand name. However, regardless of the name, the basis of all good grass seed mixtures must necessarily be the same. The important feature of a good mixture is that it contains heavy, plump seeds from selected grass stocks that have been grown for the distinct purpose of seed production. Careful blending plays its part in the compounding of a high class grass seed mixture. We have prided ourselves upon the super-quality of our grass seed mixtures which have established a reputation in the past twenty-five years.

Price: \$1.10 per lb.; 2 lbs., \$2.10; 5 lbs., \$5.00; 10 lbs., \$9.50; 25 lbs., \$22.50; 100 lbs., \$87.50.		

**Wild White Clover** A comparatively recent introduction of this strain of Clover. It is very vigorous and of a thick, dwarf growth. An important feature is its lack of flowers which is a great advantage in maintaining a green lawn. Wild White Clover is more vigorous than any weed, and because of its all around excellence we recommend its use in the finest lawns, whereas in the past we have never recommended the use of ordinary Dutch White Clover except for specific purposes. One pound is sufficient for 800 square feet. Price: 1 lb., \$3.00; 5 lbs., \$14.00.
